# Outdoor Infrared Patio Heaters

By Infrared Dynamics

Just because the sun goes down or the weather unexpectedly turns chilly doesn't mean your outdoor dining, entertaining, or outdoor event has to stop. You can comfortably and efficiently warm your outdoor dining and entertaining areas and extend your outdoor entertaining season for several months with our great line-up of **Sunpak** Patio Heaters. **Sunpak** Outdoor Infrared patio heaters are produced by **Infrared Dynamics**, the recognized leader in the outdoor comfort heating industry. Produced with Pride in the USA Since 1966.

**Sunpak** heaters are simple to operate and use draft free and highly energy efficient infrared radiant energy just like the sun's warming rays. **Sunpak** heaters warm objects rather than trying to inefficiently heat the air. Each heater will heat about a 12ft x 12ft area depending primarily on wind conditions. **Sunpak** heaters have been installed world-wide in thousands of premium residential and discerning commercial installations.

**Sunpak** heaters come with either a single stage output which can be controlled with a standard wall switch (S25 and S34) or dual stage output controlled with a hand held remote or "On-Off-Hi-Low" wireless wall control (Model TSR Only). All **Sunpak** heaters are CSA Design Certified and are equipped for clean burning, cost effective, and highly efficient Natural Gas or Propane fuels. Please consult your local building codes for proper installation and safety requirements. **Sunpak** heaters are design certified for outdoor use and outdoor installations only.

- Fully Automatic On/Off Control System
- High Efficiency Ceramic Infrared Burner System
